Front-end Developer : I currently have 2 years of experience.
To date I have knowledge in: **HTML - CSS - Javascript - Bootstrap - SASS - Wordpress - Woocommerce - Elementor**. I am currently training in React and studying English at the Universidad Nacional del Oeste. I am open to be part of a team that challenges my skills and allows my development as a Frontend Developer.

EXPERIENCE

• **Programming** Frontend web development

As a trainee, my experience is based on the development of different personal projects. In these, my three main pillars are: focus on user experience, intuitive web design and neat code.

My skills as a graphic designer give me a keen eye for detail. I have worked on e-commerce, subscription course websites and informational websites.

My projects can be found in my portfolio, at the top right of this CV.

I consider myself curious and have extensive experience solving my doubts on the internet. Being self-taught has strengthened my ability to overcome common problems in development.

• **Graphic Designer**

My six years of graphic design experience covers a wide range of projects, including branding design, publications, cards, banners, presentations and other forms of artwork.

This experience has enriched my skills and knowledge in graphic design, strengthening my vision and approach when approaching design projects.

Skills: **Photoshop, Corel Draw, Adobe Illustrator and Canva.**

EDUCATION

My training in the field of web development is mostly self-taught, obtaining knowledge through online resources such as Platzi, Mozilla Developer, r/Argentina program, and the usual search engines like Google or audiovisual as Youtube.

Currently, I am dedicated to perfecting my JavaScript skills and learning advanced technologies such as React, Tailwind and improving my English level.

• **Language**:
English - Level **A2** - **B1**

SKILLS

Self-starter │ Creativity │ Adaptability to change │ Attention to detail.
